

## LD153

### HIGH-POWER INTERIOR/EXTERIOR LED UPLIGHT

The LD153 is a powerful and robust uplight with a compact size and depth, ideal for lighting interior or exterior walls. This product can be specified with a wide range of options allowing it to suit many project requirements with multiple bezel finishes to choose from. Available LED engines include E3, Tunable White, CLR, RGBW and F1 which offer a range of colour temperatures between 2200K-5000K and various beam angles. The bezel is secured by 4 screws that lock into the mounting surface using our clever O-ring compression system, acting as an additional layer of security in public areas. The LD153 features a black trim, toughened glass and emits a powerful but low glare illumination which can be further enhanced through the use of optional glare shield accessories. This is a very tough, high quality fitting, machined from high grade materials, ensuring excellent thermal and light output performance.

## DIMENSIONS AND FIXING ACCESSORIES

Dimensions in mm

### /483S First fix sleeve

First fix sleeve is polypropylene, with a finned top to fix into various surfaces.

### /483N or /483N-2 Concrete housing

Must be used when specifying the 700mA fitting. The aluminium housing is used as a heat sink which keeps the LED fitting cool through the thermal transfer of the heat within the housing to the surrounding concrete. The housings are big enough for IP rated connections to be made inside the housing and a second gland is available for cabling onto the next luminaire.

/ID Optional integral non dimming driver (single colour only at 350mA or 500mA).

**/483N**  
Concrete housing with 1x PG9 IP67 gland

**/483N-2**  
Concrete housing with 2x PG9 IP67 gland

## FIXING MECHANISM

**1** Fitting pushed into housing

**2** Orientate fitting. Then tighten 4 screws

**3** Ring is pulled up and expands the O ring, locking fitting into the housing

## GLARE SHIELD OPTIONS

LD153 is available with a choice of glare control options. Please refer to our photometric files for lumen data.

### /NGS No glare shield

For maximum lumen output. Deep recessed optic and matt black anodised optic holder aids in glare reduction.

### /GS Glare shield

Standard glare shield. This glare shield provides an excellent balance between glare control and lumen output and works well in most applications.

### /GSHM Half moon glare shield

Half-moon glare shield. For applications that require very low glare. Lumen output typically reduced by 60%.

Photometric files (LDT) are included in the design pack which can be downloaded from the LD153 product page on the website.

### F1 LED Engine

Cone diagrams below are based on a 3000K F1 LED engine run at maximum output 700mA, 10W. Images below represents beam outputs when wall washing a 3m wall, spaced 125mm away from the lit surface. Photometric files (LDT) are included in the design pack which can be downloaded from the LD153 product page on the website.
