AVAILABLE FINISHES

Please refer to our finishes guide for full details

316 STAINLESS STEEL

- Marine grade 316 Steel
- > Standard machined finish
- > Extremely durable with very high corrosion resistance
- Passivation is recommended to further strengthen the existing high corrosion resistance, if the fitting is to be continuously subjected to salt water
- > Interior & exterior use

POLISHED & PASSIVATED 316 STAINLESS STEEL

- > Marine Grade 316 Steel
- Pristine mirror like finish
- > Extremely durable with very high corrosion reistance
- Passivated to extensively prolong resistance to corrosion and brown stains caused by oxidation in marine environments
- > Interior & exterior use

MACHINED BRASS

- > Solid CZ121 Brass
- > Standard machined finish
- Corrosion resistance rated fair to excellent
- Please note a natural green/brown patination layer will form after long term exposure to the elements, the extent of this discolouration will be dependant on its location.
- > Interior & exterior use

FLAMED SOLID BRONZE

- > Solid Bronze
- Hand finished Flamed Bronze unique to LightGraphix
- Extremely durable with very high corrosion resistance
- > Please note a natural dark patination layer will form after long term exposure to the elements, the extent of this discolouration will be dependant on its location.
- > Interior & exterior use

PAINT FINISH - POWDER COAT

- > White (RAL 9016), Black (RAL 9005), Classic Bronze (YM262E), Gunmetal Grey (RAL 7021) and other RAL colours available
- Smooth matt texture unless stated otherwise
- Not recommended for footlights in high traffic areas
- > Interior & exterior use

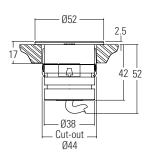

DIMENSIONS AND FIXING ACCESSORIES

Dimensions in mm

/SC Spring clip fixing

Useful for plinth or downlight applications

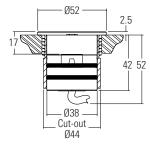

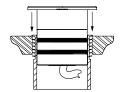

/476 O-rings and sleeve

A more robust and water tight method of fixinG for in-ground applications

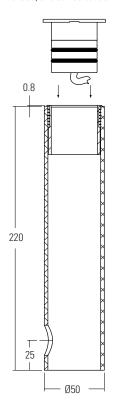

/476GT Ground tube

The in-ground tube has been designed for applications where a recessed uplight is required in soil or gravel terrains. The tube can be buried with the necessary wiring and then the fitting installed after the landscaping work has been completed. It is supplied with the fixing sleeve bonded into the tube, and can be cut down on site.

GLARE CONTROL OPTIONS

/GS56 Glare shield (not available with oval beam)

An optional glare shield is available to further reduce glare from the LED and optic. This is useful in narrow details where people may stand directly over the fitting. The glare shield does not reduce the light on the lit surface (wall) but will cut out some light onto the ceiling.
